

Redcord Professional Workstation

The Professional Workstation installs from overhead ceiling structure and provides a “zero footprint” installation to allow flexible usage of the space below the unit. The Professional Workstation provides for variable fore/aft positioning of the Redcord apparatus and additional suspension points particularly suited for advanced offloading techniques. The working footprint below the unit is approximately 80” wide by 76” long (the professional should be able to maneuver around at least three sides of a client working on the apparatus). The actual dimensions of the frame are 72” long by 24” wide. Overhead installation of the Workstation requires attachment to the ceiling of the facility. The ceiling must be of adequate structural integrity and within 11’ of the floor.

Introductory Price: \$4,495 / each (plus shipping)

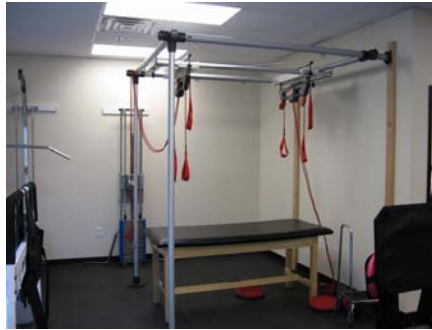

Lease to Own (estimated*): \$163/month per unit leased over 36 month term (9.9% APR)

\$109/month per unit leased over 60 month term (10.0% APR)

* Equipment lease provided by Marlin leasing. Monthly lease price is an estimate only, based on purchase of three stations and inclusive of taxes and shipping. Lessee may purchase equipment at end of lease term for \$1.

Wall-Mounted Professional Workstation

The wall-mounted Professional Workstation has the same functionality as the ceiling mounted Professional Workstation but must be installed along a structural wall and is supported by legs that rest on the floor. This installation does not require any attachment to the ceiling. Working footprint is 72" along the wall and 84" perpendicular to the wall.

Introductory Price: \$5,599/ each (plus shipping)

Lease to Own (estimated*): \$202/month per unit leased over 36 month term (9.9% APR)

\$134/month per unit leased over 60 month term (10.0% APR)

* Equipment lease provided by Marlin leasing. Monthly lease price is an estimate only, based on purchase of three stations and inclusive of taxes and shipping. Lessee may purchase equipment at end of lease term for \$1.

Cable-to-Ceiling Station & FEX³ Group Training Center

Similar to the wall-mounted Professional Workstation, the cable mounted workstation attaches to the wall but substitutes a cable attachment to the ceiling in place of the legs. This eliminates the permanent footprint associated with the legs and keeps the floor space beneath the workstation free for flexible use. The cables must be attached securely to overhead structure in the ceiling (or alternatively back to the wall at a 45deg angle). Cable length can accommodate any ceiling height.

This station can also be supplied with an expansion kit that allows the unit to be adapted to an ActivCore FEX³ Group Training Center. Three individuals can conduct simultaneous single apparatus ActivCore exercises on each leg of the rectangle. The unit extends 84" from the wall and spans 80" of wall space.

Introductory Price: \$5,445/ each (plus shipping)

Lease to Own (estimated*): \$195/month per unit leased over 36 month term (9.9% APR)

\$130/month per unit leased over 60 month term (10.0% APR)

* Equipment lease provided by Marlin leasing. Monthly lease price is an estimate only, based on purchase of three stations and inclusive of taxes and shipping. Lessee may purchase equipment at end of lease term for \$1.
